

CHEMPARK-Management & Services

CHEMPARK Permits

Our services

Permits from the regulatory authorities are required for virtually all types of plant that are installed and operated. The regulations / statutory requirements that have to be satisfied cover a wide range of aspects – construction, emission control, wastewater and waste, occupational health and plant safety. We offer comprehensive advice and management services for the whole spectrum. This includes information on permit legislation, as well as the management of all dealings with the authorities. Our full service means that problems arising in the course of permit procedures are handled in the best possible way.

Your advantages

- You can be certain of meeting all statutory requirements.
- You have a clear permit framework and a good basis for the safe operation of plants.
- We take care of all phases of the permit procedure so you do not need to devote your own resources.
- We have many years of experience and our proven concepts for permit applications reduce the workload involved in the permit procedure.
- We provide information at regular intervals on changes to the statutory and other applicable requirements. You are kept continuously updated and have the necessary planning security.

Our strengths

We provide all services required to ensure that permit procedures run smoothly. You need only deal with us. Our personnel have an in-depth knowledge of plant and process technology. In addition, we have experience of special aspects of permit legislation such as permits for multi-purpose plants and those handling a variety of substances, as well as procedures in the case of plants involving genetic engineering. We have close and proven contacts with the authorities and local communities.
